

INTRODUCTION

Colour coded, handheld temperature indicators. The SL-TP is available in two versions, the SL-TP-1 with $\pm 0.5^{\circ}\text{C}$ accuracy and the SL-TP-5 with $\pm 1^{\circ}\text{C} + 1\%$ of reading accuracy. Both versions are available in either white, yellow, green, red, blue or brown for easy identification to prevent cross contamination between cooked and uncooked foods.

The SL-TP series incorporate a rigid, pointed, stainless steel food penetration probe which conveniently folds back into the side of the instrument, turning it off when not in use.

The SL-TP-1 thermometers measure over the range -49.0°C to $+199.9^{\circ}\text{C}$
The SL-TP-5 series measure from -50°C to $+300^{\circ}\text{C}$
